Amit Sharma

Documentation Leader — Enterprise SaaS & Developer Platforms

Delhi NCR, India · amit_raj_1984@yahoo.co.in · linkedin.com/in/amit-sharma-815b9713 · Portfolio: amitsh1984.github.io

SUMMARY

Documentation leader with 16+ years in technical writing and 7 years managing writers. Built Sirion's documentation function for a CLM SaaS platform: a 2,600+ article help center, developer and integration docs built from scratch, and AI-assisted release documentation. Pairs traditional craft (SME interviews, information architecture, Microsoft Manual of Style) with GenAI workflows that keep writers in charge of accuracy.

KEY ACHIEVEMENTS

- **Cut release-note first drafts from 5 working days to 1–2** with LLM-based drafting workflows, with writers validating and signing off every draft.
- **Built 1,190+ developer and integration articles from scratch:** B2B API v2/v3 guides and guides for Salesforce, SAP Ariba, SAP S/4HANA, Microsoft Dynamics, Oracle, Workato, and SCIM.
- **Migrated 2,600+ help articles from RoboHelp 11 to Document360**, restructured into user, administrator, and API portals in English and German.
- **Grew help center use 25× in three months**, with 82% of views ending in a full read; functional-gap and invalid-bug tickets fell 20% year on year while total volume stayed flat.
- **Introduced WalkMe, then led the switch to Whatfix**, cutting training costs and onboarding about 15 custom client accounts that added revenue.
- **Built the writing team from scratch**; promoted two writers, with strong long-term retention.

EXPERIENCE

Sirion · Gurugram

Feb 2024 – present

Senior Manager, Technical Documentation Jun 2026 – present · *Manager, Technical Documentation* Feb 2024 – Jun 2026

- Lead a team of four writers (associate to senior) owning help center, API and integration docs, release notes, release previews, and website feature pages.
- Spearheaded the RoboHelp 11 to Document360 migration and the build-out of the API & Integration Suite.
- Built LLM-based drafting and review workflows (Claude, ChatGPT, Gemini) with source grounding and writer sign-off.
- First line of defence for product questions from sales, presales, support, customer success, and account teams; run monthly release walkthroughs and an organization-wide newsletter.

Career break

Jul 2023 – Jan 2024

SirionLabs · Gurugram

Apr 2017 – Jun 2023

Manager, Technical Writing Jan 2022 – Jun 2023 · *Associate Manager* Aug 2019 – Dec 2021 · *Senior Technical Writer* Apr 2017 – Aug 2019

- Set up the documentation framework and MSTP-based templates and editorial standards; restructured core product documentation.
- Introduced WalkMe for in-app onboarding; later migrated to Whatfix and onboarded about 15 custom client accounts.
- Ran appraisals, KRAs, and development plans; delivered against SLAs and KPIs.

Snapdeal · Senior Technical Writer

Feb 2015 – Mar 2017

- Documented REST APIs from OpenAPI (Swagger) specifications and tested them in Postman; built Confluence wikis and architecture and process diagrams; ran monthly tech talks.

Earlier roles · Technical Writer to Senior Technical Writer

Jan 2008 – Feb 2015

- Paramarsh Informatics, SThree Telepresence, Aptara, IBM India, Kogent Learning Solutions: user, admin, and integration guides, release notes, SRS, and training material.

SKILLS AND TOOLS

- **Leadership:** team building, hiring and promotion, appraisals and KRAs, SLA and KPI delivery, cross-functional stakeholder management
- **Content:** help centers, API and integration docs, release notes, information architecture, editorial standards (Microsoft Manual of Style), localization QA (English–German)
- **Tools:** Document360, RoboHelp, Confluence, Jira, Whatfix, WalkMe, OpenAPI/Swagger, Postman, Markdown, HTML, SharePoint
- **AI:** Claude, ChatGPT, Google Gemini, Napkin, prompt engineering, RAG-ready content

EDUCATION AND CERTIFICATIONS

- **MCA** and **BCA**, Indira Gandhi National Open University
- Certifications: How to Research and Write Using Generative AI Tools · AI Agents for Product Leaders · LLM Foundations: Vector Databases for Caching and RAG · Introduction to Prompt Engineering for Generative AI · Instructional Design: Needs Analysis
- Languages: English (full professional), Hindi (native)
